THE PART NO OTHER TIP JAR HAS

Streamers get live tip alerts. Now the stage does too.

The actual live demo at live.tips — the real renderer, running in the browser.

- **Name, message, confetti** — every tip pops up the moment it lands, and tonight's goal fills up in front of the audience.
- **No OBS, no stream, no account** — a tablet on stage is the whole setup.

FANS PAY WITH WHAT THEY ALREADY HAVE

One QR code. Every way to pay.

The audience scans **one code** and picks whatever is already on their phone. No app to install, no account to create. **This one is real — try it.**

These move money **directly between people** — with no card processing fee in between at all.

€0.00

of every app-to-app tip goes to fees. The whole amount lands with the artist — and we still see none of it.

Why every platform takes a cut — **and we can't even if we wanted.**

EVERY TIPPING PLATFORM

LIVE.TIPS

The QR code is the artist's own Stripe payment link — the money never touches us.

0%

platform fee. Forever.

No middleman, no servers holding money — nothing to take a cut for.

NO ACCOUNT · NO SIGNUP · NO SERVERS

On stage in minutes.

1

Paste a key from your own Stripe

A restricted key, created in your Stripe dashboard in two minutes — guided. It never leaves your device.

2

Print your QR code

The app creates a pay-what-you-want payment link in your account. Tape it to the guitar case, the merch table, the piano.

3

Play

Fans scan and tip with Apple Pay, Google Pay or card. Every tip lands in your Stripe — and lights up the stage screen.
